

IListener::getPackSize

```
graph LR; A[IListener::getPackSize] --> B[DataVersion::getPackSize]; A --> C[DataHandle::getPackSize]; B --> D[ContextPrefix::getPackSize];
```

The diagram illustrates a sequence of method calls. It starts with a gray box on the left labeled 'IListener::getPackSize'. Two blue arrows originate from its right side: one points to a white box labeled 'DataVersion::getPackSize' and the other points to a white box labeled 'DataHandle::getPackSize'. From the 'DataVersion::getPackSize' box, a third blue arrow points to a final white box on the right labeled 'ContextPrefix::getPackSize'.

DataVersion::getPackSize

ContextPrefix::getPackSize

DataHandle::getPackSize
