

GemmTask::run

```
graph LR; A[GemmTask::run] --> B[check_gemm]; A --> C[dumpData]; A --> D[IDuctteipTask::getName]; D --> E[to_string];
```

The diagram illustrates a directed graph with five nodes. The first node, 'GemmTask::run', is highlighted with a gray background and has three outgoing arrows pointing to 'check_gemm', 'dumpData', and 'IDuctteipTask::getName'. The 'IDuctteipTask::getName' node has a single outgoing arrow pointing to 'to_string'. All nodes are rectangular boxes with black outlines and black text.

check_gemm

dumpData

IDuctteipTask::getName

to_string
