

IData::getDataByHandle

```
graph LR; A[IData::getDataByHandle] --> B[IContext::getContextHandle]; A --> C[IData::getDataHandle];
```

The diagram illustrates a branching relationship from a single source to two destinations. On the left, a gray rectangular box contains the text 'IData::getDataByHandle'. Two blue arrows originate from the right side of this box. The upper arrow points diagonally upwards and to the right, terminating at a white rectangular box containing the text 'IContext::getContextHandle'. The lower arrow points diagonally downwards and to the right, terminating at a white rectangular box containing the text 'IData::getDataHandle'. All boxes have a black border, and the arrows are a solid blue color.
